

Welcome to join The Leading Event of Advanced Materials and  
Process Engineering in China

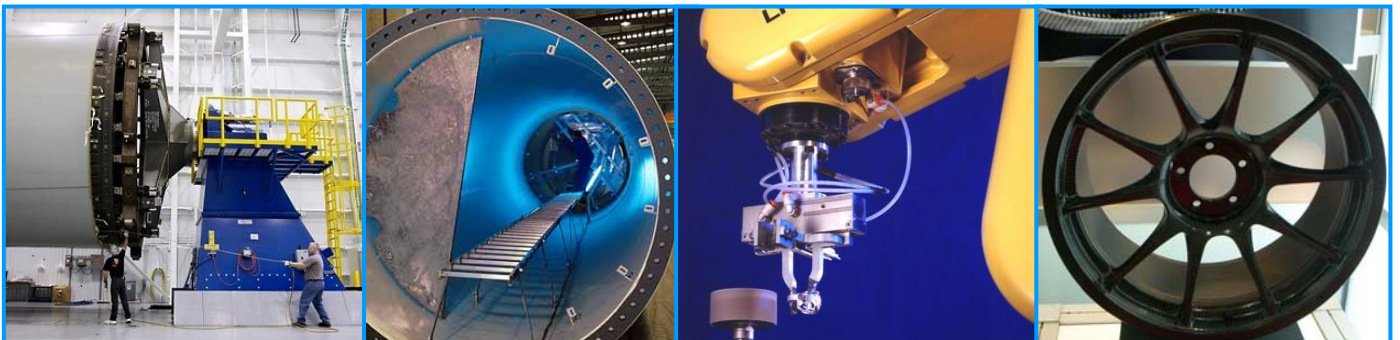

## SAMPE CHINA 2011 CONFERENCE & EXHIBITION

DATE: 26-27-28, October, 2011

LOCATION: Tianjin Binhai International Convention & Exhibition Center

# CALL FOR PAPERS

## International · Forward-looking · High-level End

SAMPE (The Society for the Advancement of Material and Process Engineering) was formed in 1944. It is an international professional member society, provides information on new materials and processing technology either via technical forums, journal publications, or books in which professionals in this field can exchange ideas and air their views. As the only technical society encompassing all fields of endeavor in materials and processes, SAMPE provides a unique and valuable forum for scientists, engineers, and academicians. Material and Process engineering is the technology by which materials are developed or selected and manufacturing processes chosen which will convert those materials into products which meet the design, performance, producibility, quality, and cost effective criteria required.

This is the 6<sup>th</sup> SAMPE CHINA Conference & Exhibition event which was set up in 2006 sponsored by SAMPE Beijing Chapter, SAMPE Shanghai Chapter and Materials Engineering Committee of Chinese Society of Aviation and Aeronautics (CSAA). So far, SAMPE CHINA has become one of the largest scale, the most influenced event of SAMPE in Asia.

The workshops during SAMPE CHINA as below:

- ◇ SAMPE CHINA Exhibition
- ◇ SAMPE CHINA Conference
- ◇ SAMPE CHINA Annual
- ◇ Technology Course
- ◇ Poster Session
- ◇ The SAMPE International Super Lightweight Composite Bridge/ Wing Student Contest

As the most important platform for industry, academia, research, but also the carrier of advanced materials in particular advanced composite products and technology. There were about 398 attendees joining SAMPE China 2010 Conference coming from China, The United States, Canada, Germany, France, Spain, Switzerland, Japan, Korea, Singapore, Malaysia, Taiwan and Hong Kong, 12 countries and regions. In the exhibition, nearly 1,000 professional visitors from various countries and regions, came to visit the exhibition for marketing, purchase, and technical communication.

SAMPE Journal, the official journal of SAMPE, reported this annual event in detail on color-printing pages every year.

As customary, SAMPE CHINA 2011 will move to the biggest coastal city in North of China, Tianjin.

We are sincerely inviting all the experts and colleagues working in this area to participate in the event to share your R&D experiences and knowledge with the Chinese colleagues and international participants.

## **SPONSORS**

SAMPE Beijing Chapter                      SAMPE Shanghai Chapter  
National Key Laboratory of Advanced Composites, BIAM, AVIC  
Materials Engineering Committee of Chinese Society of Aviation and Aeronautics (CSAA)

## **CO-SPONSORS**

SAMPE USA ( Headquarters )              SAMPE Europe  
SAMPE Japan Chapter                      SAMPE Taiwan Chapter  
China Chemical Fibers Association

## **ORGANIZER**

Beijing UFT Conference & Exhibition Co., Ltd

## **SPECIAL SPONSORS**

## **CALL FOR PAPERS**

SAMPE CHINA 2011 invites Designers, Engineers, Researchers, Processors, Manufacturers and End Users being active in or for the Aerospace, Defence, Marine, Green Energy, Automobile, High-speed Train, and other Advanced Manufacturing Industry to present their latest innovation, development, achievement, test-results and new applications in the field of High Performance Advanced Composites at SAMPE CHINA 2011, by submitting an Abstract of 200 words maximum for judgment and selection by the joint Academic Committee of SAMPE CHINA research, development, applications, and engineering paper topics will include, but not be limited to: Materials technology, Thermoplastic composites, Multifunctional and Hybrid materials, Processing technology, Process automation, Testing and NDE, Maintenance and Repair, structures and applications, Design and analysis, Impact resistance and Damage tolerance, New tooling concepts.

By mid September 2011 all authors of abstracts will be informed about the selection. Authors of papers that will be invited for presentation are requested to remit the file of the full paper not later than September 30th. 2011. Speakers/Authors of selected papers will get a substantial reduction on the full registration fee, which will be including the conference sessions, exhibits, welcome reception, coffee breaks, Three lunches, the Banquet and Award Dinner, and a Conference Proceedings.

**KEY DEADLINE**

Call for Abstract	Now Opened!
Abstract Submission	August 15, 2011
Notification of Acceptance	September 15, 2011
Paper Submission	August 31, 2011
Pre-Registration	June 30- August 31, 2011
SAMPE CHINA 2011	October 26-28,2011
